

## **INFORMACIJE O POSLOVNEM POVPRASEVANJU:**

We have been looking at the Slovenian defense industry with great interest for some time now and are reaching out to engage with your organization as the collective hub and center of knowledge in your country. To enable us to understand the Slovenian market and whether what need there is for our products would you please send us any information you think is appropriate about your organization and joining details.

Our core business is the development of unmanned aerial vehicles and their subsystems for both military and commercial applications. We would be extremely grateful if you could recommend any companies acting as agents between foreign manufacturers and domestic end-users that we should make contact with.
